## Section 11: TOXICOLOGICAL INFORMATION

### Acute Toxicity

#### Information on likely routes of exposure

<b>Inhalation</b>	As a nuisance dust, prolonged exposures above recommended levels may cause adverse effects on the lung. Temporary drying effect and/or irritation of mucous membranes may result from excessive exposure. Exposure to dust may aggravate pre-existing respiratory conditions.
<b>Eye Contact</b>	Inert foreign body hazard only.
<b>Skin contact</b>	Titanium dioxide does not penetrate either intact or abraded human skin. Prolonged contact may result in rashes/irritations due to drying of the skin and/or mechanical abrasion related to skin-to-clothing contact or skin-to-skin contact.
<b>Ingestion</b>	No data available

#### Numerical measures of toxicity - Component Information

##### **Component Information**

Chemical name	Oral LD50	Dermal LD50	Inhalation LC50

#### Delayed and immediate effects as well as chronic effects from short and long-term exposure

<b>Skin corrosion/irritation</b>	Titanium dioxide was not classifiable as a skin corrosive or irritant based on in vivo test results for titanium dioxide submitted in the European Union (REACH) joint submission

registration dossier for the substance.

**Serious eye damage/eye irritation** Titanium dioxide was not classifiable as an eye irritant based on in vivo test results for titanium dioxide submitted in the European Union (REACH) joint submission registration dossier for the substance

**Sensitization** No information available

**Germ Cell Mutagenicity** Titanium dioxide was negative when tested in vitro in bacterial reverse mutation assays and in mammalian cell gene mutation and clastogenicity assays as well as when tested in vivo.

**Carcinogenicity** Titanium dioxide is listed by IARC as possibly carcinogenic to humans (Group 2B). This listing is based on inadequate evidence of carcinogenicity in humans and sufficient evidence in experimental animals.  
In lifetime inhalation studies of rats, airborne respirable-size titanium dioxide particles have been shown to cause lung tumors at concentrations associated with substantial particle lung burdens and consequential pulmonary overload and inflammation. However, other laboratory animals such as mice and hamsters did not develop lung tumors under similar testing with titanium dioxide. Furthermore, human epidemiology studies do not suggest an association between occupational exposure to titanium dioxide and risk for cancer.

Chemical name	China	IARC
Titanium dioxide	-	Group 2B

*IARC (International Agency for Research on Cancer)*

*Group 2B - Possibly Carcinogenic to Humans*

**Reproductive Toxicity** Titanium dioxide was not classifiable as a reproductive hazard based on in vivo test results for titanium dioxide submitted in the European Union (REACH) joint submission registration dossier for the substance.

**Developmental Toxicity** None known

**Teratogenicity** None known

**STOT - single exposure** Titanium dioxide is not classifiable based on a lack of significant and/or severe toxic effects in humans or in experimental animals following acute exposures.

**STOT - repeated exposure** Repeated inhalation exposures in rats to poorly soluble dusts such as titanium dioxide lead to a pattern of pulmonary effects including inflammation and fibrosis that are not observed in other rodent species, nonhuman primates, or humans under similar conditions. Therefore, titanium dioxide is not classifiable for repeated exposure.

**Target organ effects** Eyes, Lungs, Respiratory System

**Symptoms** No information available

**Aspiration Hazard** No information available

## Section 12: ECOLOGICAL INFORMATION

**Ecotoxicity** Titanium dioxide is of low acute aquatic toxicity.

**Persistence and degradability** Titanium dioxide is persistent and does not bioaccumulate. Not readily biodegradable.

**Bioaccumulation** Material does not bioaccumulate

**Mobility** Not mobile

**Other adverse effects** No information available

**Endocrine Disruptor Information** This product does not contain any known or suspected endocrine disruptors.
